Clean data for even cleaner analytics

Solargis Monitor Professional

Incorporate real-time satellite data used to fill gaps in pyranometer data

Solargis Monitor Basic

Incorporate daily updated satellite data used to fill gaps in pyranometer data

Er Eisman Wind Reporting

Create Eisman reporting directly in Greenbyte

Frequently asked questions

Do I have to be a Greenbyte Customer to purchase add-ons from the marketplace?

Yes

Are marketplace add-ons free or priced?

Fees for add-ons are detailed in the fee schedule, provided to customers upon request.

How do I order an add-on?

To be able to purchase Marketplace add-ons customers need to be on a Greenbyte contract signed after November 1st 2019, which denote the add-on purchasing process. Once you've found an add-on that you want, click the "Learn More" button and fill in your details or simply reach out to your Customer Success Manager. A Greenbyte representative will reach out to you to provide more information. Once you've signed an order form your add-on will be activated.

Can I develop add-ons for Marketplace?

In the future there will be a dedicated site available with deep API documentation for third-party developers. In the meantime, you can contact marketplace@greenbyte.com to get API access.

How do I become a partner to Greenbyte Marketplace?

We want to grow Marketplace and give our customers access to new opportunities for them to become successful. If you think you could be a good fit, please reach out to marketplace@greenbyte.com.
